

BAGEN YEDEK PARÇA OTOMOTİV MAKİNA SAN. VE TİC. A.Ş.

ENVIRONMENTAL POLICY:

Not to harm the ecological balance,

To provide all kinds of protection against environmental and human health and to prevent environmental pollution as a result of our activities,

Aiming at reducing negative environmental impacts from design to life cycle and to evaluate climate change and sustainability as a priority in all of our activities,

Improving the environmental safety awareness of our employees with continuous trainings and making the environmental management system understanding into life philosophy,

Minimizing waste at its source, ensuring reuse and recycling,

To ensure that unusable wastes are disposed of with appropriate methods,

To reduce noise emissions,

To ensure efficient use of energy, raw materials and natural resources,

Using renewable energies, reducing greenhouse gas emissions, improving air quality,

To reduce water consumption, use water efficiently and improve waste water quality by applying a responsible water management approach,

To support the protection of biodiversity, ecosystems, soil quality and forests

To manage the use of chemical materials with environmental responsibility, not to use banned and restricted chemical materials,

Fulfill compliance obligations, increasing environmental performance, we are committed to continuously improving and developing our environmental management system with our thinking based on risk analysis.

Chairman of the Board
Bahattin KIRBOĞA
